SEWERIN
Protecting Water, Gas and Life.

Safety in the workplace – all the time and everywhere

Safely access shafts and other confined spaces

From measurement to rescue: Everything from the one source

Move safely in hazardous areas

Your multiple gas warning device for the preventive measurement of hazardous gases.

Multitec® 520

See below for detailed product information:

- Measures up to six gases at the same time – ideal for a variety of applications
- Explosion protection:
  TÜV 07 ATEX 553353 X
  Ⓔx II 2G Ex db eb ib IIB T4 Gb, basic device without leather bag; IIC, basic device with leather bag
  BVS 09 ATEX G 001 X, PFG 08 G 002 X
- Selective infrared sensors for hydrocarbons and carbon dioxide
- Durable sensors for oxygen and toxic gases
- Menu-driven device inspection with electronic documentation
- Flexible configuration for individual requirements
- Ergonomic design for comfortable handling
- Sturdy housing for daily use in real conditions

Continuously monitor your workplace

Your versatile gas concentration measuring device for the preventative measurement of hazardous gases.

EX-TEC® PM 580/550/500

See below for detailed product information:

- Certified functional safety in the inspection in / of structures and monitoring workspace applications
- Intelligent support throughout guided device inspection
- Infrared sensors for measuring hazardous gases
- Detection of up to five different gases
- Practical and safe one-handed operation
- Explosion protection:
  TÜV 17 ATEX 171969 X
  IECEx TUN 17.0027 X
  Ex II 2G Ex db eb ib IIC T4 Gb
  BVS 19 ATEX G 002 X, PFG 19 G 004 X

Always fresh air in the shaft

Fan for ventilating shafts and enclosed spaces.

FLIS-EX

See below for detailed product information:

- Explosion protected ventilation device with 230 V connection
- 20 m long connection cable for use in a flexible radius
- Two sturdy corrugated hoses, each approx. 2.3 m, for suction and pressure operation
- Extension hose included in the practical quiver
- Safe for use in shafts, ducts and confined spaces
- Easy to handle – even when wearing personal protective equipment
- Small, compact and complete: Accessories always at hand in the housing
- Reliable technology for professional everyday work
- Explosion protection:
  TÜV 05 ATEX 2766 X
  Ex II2G IIC T4 Gb

Enter the shaft safely

Aluminium tripod for climbing up and down shafts, into sewers or for emergency rescues.

Aluminium tripod

- 6-fold teloscopic
- Easy to transport and set up
- Overall height: 1886 to 2386 mm
- Support area: 758 to 2207 mm
- Tare weight: 24.0 kg

Together we protect people and vital resources.

It is not always easy to stay up to date. With our services, we ensure that your devices are always operational, your networks are secure and your team is always up to date. Whether you need a testing service, training or customised vehicle solutions – we are here to support you with our expertise and experience.

Pipe network inspection

Are you unable or unwilling to carry out the pipe network inspection yourself? Regardless of whether your primary concern is safety or fulfilling your reporting obligations under the Methane Regulation: Our highly trained and experienced specialists are happy to support you. In addition to classic pipe network inspections, our service also includes precise pipe location, in particular when it comes to plastic pipes by using the innovative SeViRO method, as well as odourant control.

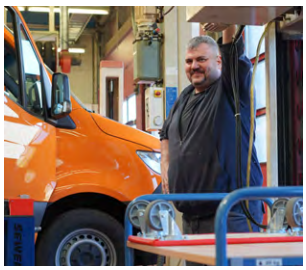

Device service

You protect human life and the environment. That is why it is so important that the technical solutions you use to do that are always operational and reliable. Our device service supports you in this – stationary, from Gütersloh, or mobile, right on your doorstep. Nine service technicians are on the move across Germany. They perform professional maintenace on the devices and carry out small repairs. This helps you minimise downtime.

Seminars

The European supply industry is undergoing a lot of change. This makes it all the more important for you and your employees to stay up to date. The Sewerin seminars help you combine theoretical knowledge about technology and regulations with practical application on our in-house training track. Experienced speakers prepare the content for you in an understandable way and always have their finger on the pulse.

Vehicle customisation

The efficiency of your work depends on the right technical solutions. This applies to the devices as well as to the on-call and fault clearance service vehicle, which is perfectly equipped for your purposes. Our experienced team plans and brings to life individual vehicle concepts that are perfectly tailored to meet your specific needs. In the process, we attach particular importance to functionality, ergonomics and quality in order to make your mobile workstations efficient and comfortable.

Building services

Do you want to focus on your core business? The building services department at Sewerin Service GmbH takes care of the regular inspection and maintenance of gas and water installations as well as electrical systems in various buildings. Our range of services includes the monitoring and technical maintenance of installation systems, gas pressure regulators and the replacement of meters. Preventive maintenance measures help us ensure the safety and longevity of your building technology systems.

Questions? Give us a call.

Which solution is right for the challenge you are facing? How can you ensure the personal safety of your team even better? Let’s talk. Our service and sales team will be happy to help you.
